

Policy RAG

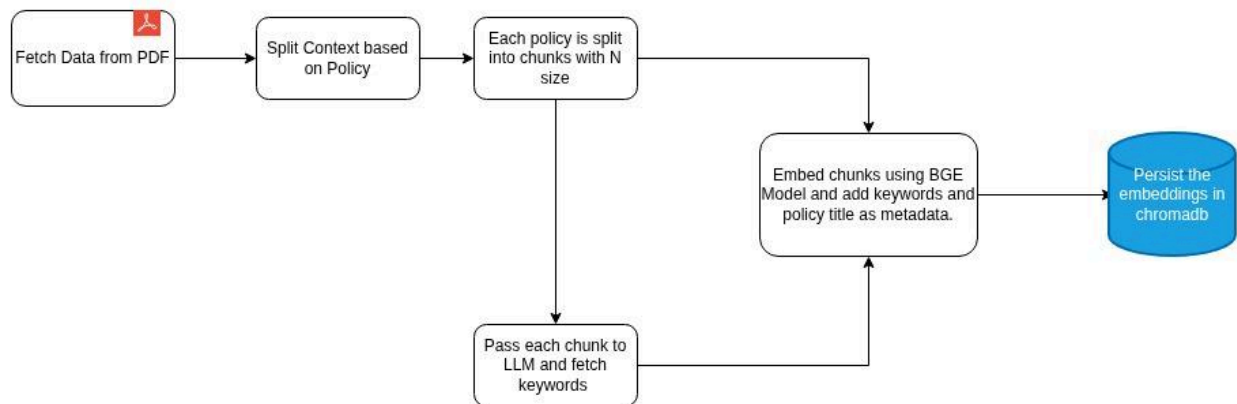

In Milestone 4

Following parameters chosen:

1. **Model:** BGE 1.5, allMini
2. **Chunk size:** 500,700
3. **Overlap:** 50,70
4. **Retrieval strategy:** Hybrid querying strategy and summarizing the output for setting LLM's context

Based on the results it was concluded that there needs to be an upgrade in Policy rag and it needs to be context aware.

Following is the updated Chunking strategy.

Pls check the below for performance of the new RAG system
