

Team Name: Team -5

Project Title: AI Fashion Chatbot

Milestone #: 4

1. Summary of Changes Based on Previous Feedback:

Area	Feedback Received	Changes Implemented	Evidence / Notes
Hyperparameter tuning	The hyper parameters were tuned during development but not documented for policy embedding	Documented properly about policy embedder	in the milestone 4 doc we have tried bge-base-en-v1.5 and AllminiLM-l6-v2 model and tried out 2 chunking and 2 retrieval strategies
	The hyper parameters were tuned during development but not documented for Product embedding	Multiple chunking and retrieval strategies were mix and matched, also changed the context for Main LLM	Rated all the 4 strategies tried using human-in-loop method and documented the scores in milestone doc
Model architecture	Only flow diagrams were present but not the architecture diagrams	Architecture diagrams were included	Architecture diagram is included in the milestone doc

2.Work Distribution

Task	Assigned Member	Role / Responsibility	Completion Date
Image data management	Neeraj	The data consists of both textual and image data, totalling to 30 GB. And, since it is not possible to put it on a G-Drive, Neeraj has downloaded the whole dataset from the website and kept it on his machine.	27-10-2025
	Harsha	Sampled 300 products for integrating the pipeline and building the flow	27-10-2025
Policy RAG and streamlit UI	Madhav	Embedding policy doc,	28-10-2025
	Madhav	Fetching chunks from policy doc	30-10-2025
	Madhav	Prompt engineering for getting answer	01-11-2025
Customer context building	Harsha	Fetches customer meta from csv and build context like age, gender, location For LLM	28-10-2025
	Manish	If not a logged in customer then followup questions are asked, for building the context about the user	30-10-2025
Product RAG	Manish	Product reranker chain	03-11-2025
	Harsha	Product fetching from embedding	01-11-2025
Product Embedding	Neeraj & Adarsh	Embedding product meta and saving it in VDB	30-10-2025
Memory and Customer session Management	Manish	Memory and customer meta is maintained in a class instance	03-11-2025
	Manish & Adarsh	Classify query whether this is policy related or product search related	02-11-2025
Preparing the submission document	Adarsh, Manish and Harsha	Preparing the submission document	04-11-2025
